Study Guide:

- Despite their name, red pandas are actually more closely related to raccoons and skunks than pandas.
- These resourceful critters use their long, ringed tails for balance, camouflage, and even warmth! They wrap their bushy tails around themselves to keep toasty in cold weather.
- Bamboo leaves are a red panda's favorite feast.

Congrats, you've climbed to the head of the class!

Visit our Kids' Corner for more  animal facts and activities!
