

Casey Arborway Project Project Advisory – Temporary Closure of Forest Hills Street at Arborway

Beginning on Monday, July 31st and continuing through the next three weeks, Forest Hills Street will be closed where it meets the westbound (towards the Arboretum) Arborway without access in or out.

This closure is a project requirement for full depth reconstruction and the extension of Forest Hills Street to the permanent alignment of the westbound Arborway. Completion of this work will include granite curbing, final pavement and all other final conditions. Access to homes on the block of Forest Hills Street between Cemetery Road and the Arborway will be maintained via Cemetery Road and the section of Forest Hills Street to the north, but there will be no through access to the Arborway.
