

Dr. Bryan Windmiller

Bryan Windmiller is the Director of Field Conservation at Zoo New England, where he oversees the Zoo's local wildlife conservation programs and its support of international conservation efforts.

Bryan earned a PhD in biology and a Master's degree in Environmental Policy, both from Tufts University and he has worked in various roles as a conservation biologist since 1987, specializing in the restoration of rare turtle, frog, and salamander species in Massachusetts.

Bryan is an adjunct professor at the Tufts University School of Veterinary Medicine and has taught at several Massachusetts universities.
