

# Our Food and Beverage team knows that every effort counts. We support the Zoo's conservation efforts by making choices that help contribute to a better future.

Learn more about some of the actions we're taking at Zoo New England.

Our products contain only responsibly sourced palm oil or no palm oil at all to aid in the conservation of rainforests, vital habitats for many of our animals.

We serve meals in 100% compostable containers from World Centric Products, which gives 25% of profits to groups working to create a better world. All our compostable products meet ASTM D6400 or ASTM D6868 standards.

We use environmentally friendly cups, lids, and serveware. Replacing petroleum-based plastics with sustainable and renewable plant-based options helps divert waste from the landfill.

Recycling containers can be found around the Zoo for the convenience of our guests. We bale our cardboard to recycle boxes that can be used to make new products.

We've eliminated plastic straws. Every day in the U.S., 500 million plastic straws are used once and thrown away. Many end up in the water, causing harm to wildlife.
